★ ANTI DIRT

★ WATER RESISTANT

★ LOW VOC

★ ANTI FUNGAL

★ ALGAE RESISTANT

Weather Classic Max is Anti Dust Exterior Emulsion with HD Quality. It is water based and non effective to exposure due to its 100% Acrylic Emulsion Base with Extra Silicone to provide excellent durable coating.

Surface Preparation:
Surface to be painted is to be free from any loose paint film, dust or grease. Any previous growth of algae & fungus should be removed thoroughly by vigorous wire brushing and cleaning with water Jetting. Fine cracks, holes, dent and other type of imperfection should be removed by using Kamocare Wall Putty or by filling imperfect area with a mix of white cement & fine sand (in the ratio of 1:3). For Freshly prepared surface, 3 months are required for curing. Apply one coat of Kamoprime Exterior Wall Primer by thinning 1 Litre of Primer with 600 ml to 650 ml of water. Allow to dry for 4 hrs. Self priming in the ratio 1:1 is also recommended.

Directions for use:
Apply 2-3 coats by diluting 1 litre of Weather Classic MAX with 350 ml to 400 ml of water. A gap of 4 to 6 hrs. should be given between the coats. Horizontal surface like top of window, ledges and other horizontal surfaces are painted with an additional coat for greater protection.

Only for Base Paint, add colorants, colorants cost extra. **4/-** NETT after Enting.
